

U.89JMA Multi-diameter fork set

Description:

- Offset forks: grip the spring at the end of the coil, this increasing the compressor's effective travel. This shape of fork is particularly effective for use on new-generation springs having a small number of coils.
 - A hinged joint at the connection to the compressor allows the fork to be aligned with the slope of the coil.
 - New design, fork fits directly onto the springs for quick installation.
 - Suitable for 100 to 215 mm springs.
 - Compatible with all U.89 bodies without modification.
- Weight: 6.600 kg.

Legs: U.20BSE4

**Screw
Size [mm]:** 24
