

W.400SUP | SHOP PRESSES SUPPORT

Description:

- Universally adjustable press support for use in standard workshop presses.
- Puts an end to dangerous wobbling structures and minimizes risks of injuries.
- The special layout of the mounting threads and the height-adjustable long and short support included in the scope of delivery ensure precise support.
- Centering attachments for fixing the support bolts in a hole on the component.
- Can also be used in conjunction with standard puller and pressure sleeve sets – centering via the receiving thread on the center of the press table support.
- For universal use for the removal and installation of wheel bearings, bushings, sleeves, silent bearings etc.
- 2 adjustable barriers on the base of the support prevent unwanted slippage on the press table.
- height max : 220 mm.
- height min : 145 mm.
- L x W : 300 x 300 mm
